CITY COMMISSIONERS APPOINTED

Adjourned Session of the City Council Held Last Evening—
Public Works Commissioner will also be City Engineer
—The Successful Applicants.

The city council met last evening in adjourned session, all the members being present. The finance committee presented a list of accounts which were ordered paid.

Two applications for Commissionership which were not to hand on Tuesday evening were read and on motion were placed among those formerly received, for consideration. The council then resolved into committee of the whole. At the suggestion of Alderman Boyle and Clark the privilege of attending was extended to the press.

After discussing the applica-

tions at considerable length the session of the council was resumed and the report of the committee of the whole was adopted; J. H. Hargreaves of Winnipeg being appointed Public Works Commissioner and city Engineer at a salary of \$2000 per year and G. J. Kinnaird finance commissioner, his duties to commence on Feb. 1st.

Mr. Hargreaves is and has been for several years assistant city engineer of Winnipeg and engineer of the town of St. Boniface. He will be notified of his appointment at once and will be in Edmonton in the course of a few days.

ROSS IS DOWN AND OUT.

The result of the Ontario provincial elections of Tuesday can scarcely be considered a surprise. A government which has only been hanging on for two parliamentary terms could only expect defeat or a third appeal unless it had some great issue on which to appeal to the people. When Mr. Ross turned down the temperance people of Ontario a few years ago he missed his chance of securing a new lease of popular favor. Had he then thrown himself boldly on the side of prohibition, he would by that stroke have rid himself of the aggregation of barnacles, not to say vampires, who have finally succeeded in wrecking his government, and he would have stood for a principle in which a large majority of the people of Ontario believe, or at least look upon with great favor. He would have been a man with a cause, a popular and righteous cause, a cause which would have given full scope to his admittedly great oratorical ability and been in line with his personal character and views and with his private life. Even though defeated at the first election, that would only have been the ground work for a more assured victory and a more permanent lease of power at the next. But to take this course involved a sacrifice for principle. He hesitated—and was lost. Once Mr. Ross had disappointed the expectations of his prohibitionist friends, the date and the majority were the only matters in doubt in connection with his defeat.

Of his successors in office there is little to be said. They have succeeded not by their merits but by his failures. They come in without a policy or a reputation. They have been elected on the simple platform that they belong to the conservative party of the Dominion and that that party has an inherent right to rule. Because it does not rule in the Dominion is a special reason why it should rule in the largest province; other reasons being unnecessary. When the new government assumes power something better may develop, but it is usual that in opposition the best principles of a party are put forward and its best men pushed to the front. Judged by that standard the accession to power of Mr. Whitney and his friends in Ontario is little less than a calamity for the province. It should be remembered that Mr. Ross was not condemned for his administration, but because he had failed to march with the progress of the times.

Superfluous Hair

Removed by the New Principle

De Miracle

It is better than electricity, because it does not scar or produce a new growth. Better than X-ray, because it does not burn, scar or paralyze the tissues under the skin. Better than depilatories, because it is not poisonous; therefore, it will not cause blood poisoning, or produce eczema, which is so common with depilatories, and does not break off the hair, thereby increasing its growth.

Electrolysis, X-ray or depilatories are offered you on the bare word of the operators and manufacturers. DE MIRACLE is not. It is the only method which is endorsed by physicians, surgeons, dermatologists, medical journals and prominent magazines.

DE MIRACLE will be mailed to any address, sealed in plain wrapper for \$1. Your money back without question if it fails to do all that is claimed for it.

Our booklet—the most complete treatise on Superfluous Hair ever published—containing the testimonials of numerous physicians and surgeons and those of hundreds of others—will be sent free, in plain, sealed envelope, upon request. Write for it to-day to DE MIRACLE CHEMICAL CO., 23 QUEEN STREET WEST, TORONTO, ONT. THE ROBERT SIMPSON COMPANY LIMITED, TORONTO, ONT.

BULLETIN CO. (LTD.)

It would seem that we are now in for

Three Months
of Steady Cold
Weather

If it was to last only a few days or weeks, then any kind of a Heating Stove would tide you through, but for a long spell of cold weather where you need your house warm night and day there is no Stove on the market so well adapted for heating as the

"Riverside Oak"

It will heat two rooms at once. It has a hot air pipe attachment and it will take the cold air from the floor, heat and distribute it into any room the Hot Air Pipe is carried into, without burning any more fuel. It burns equally well Coal or Wood and the price is very low considering its efficiency and economy.

Ross Bros. Limited have handled this Stove for a long time and can conscientiously recommend it as sure to please. Have you seen the New Steel

Monarch Range

guaranteed all Steel and Malleable Iron. The top of this Range is ground to a finish, just the same as a Fry Pan or Kettle and can be used for Frying and Toasting just the same as a French Top Range. The Ovens are the most uniform of any Ranges made. The water fronts are so modelled that they will heat twice the water of an ordinary Range. It burns either Wood or Coal equally well and will range made.

See the One in our Window

they are beauties and the price is not so high as you would expect to pay for so good an article. We keep everything in Kitchen Utensils and truly think we can give you better value than any other House in the West.

Ltd.

Telegraph

BRIEFS.

Halifax, Jan. 26th.—Dawson team received its second defeat from the wanderers 3-2.

Winnipeg, Jan. 26.—The Victorias sprung a big surprise on the Rowing Club and defeated the league leaders by 4 to 3 after the longest and most exciting game of the season. The temperature in the rink was about 25 below.

Rosser, Jan. 26th.—Epidemic of measles has broken out here. A ball has been abandoned on account of the promoters being seized with the disease.

Collingwood, Jan. 25th.—Fire burnt the 3 story business block owned by W. S. Lindsay. Loss to buildings and tenants is \$60,000.

Winnipeg, Jan. 25th.—David Jackson the aged member for Hamiota was knocked down by a dog on Portage Avenue and broke his nose in the fall. He will be laid up a week. It is probable that a fire marshall will be appointed for Manitoba on petition of the Winnipeg board of trade, and other boards of trade and public bodies. Roblin favorably considered the suggestion. The Marshal will investigate fires in cities and country.

Montreal, Jan. 25th.—At the civic reception Earl Grey said the fusion of the best English and Norman blood in England was a precious inheritance. The same happy blend will occur with the energetic French and English races of Canada and will be of lasting benefit to mankind.

Brandon, Jan. 25.—Christopher, a farm laborer employed by H. C. McPhail, hanged himself in a barn, he has a brother in Dauphin district.

Regina, Jan. 26th.—Wednesday St Pauls day was notable in Anglican annals. Archdeacon Holmes was consecrated Bishop Moscone by Bishop Pinkham. Associated with him were the Bishops of Quappelle, Calgary, Keewatin, Saskatchewan and Rupert's Land.

COURSE OF STUDY FOR SUNDAY SCHOOLS

"The General Principles underlying a course of study" was the subject of a lecture given in the lecture room of McDougall Methodist Church, Wednesday evening by Rev. C. H. Huestis. The lecture was the third of a series being given on Wednesday evenings, designed to aid the teachers and Sabbath School workers and parents in training the young.

The lecturer said the four great principles which must be taken into consideration in outlining a course of study for the Sunday School were:—

1—The pupils are passing through the formative period and the subjects must alter with the development of the child.

2—The historical character and progressiveness of the Bible must be recognized.

3—There should be a set curriculum as a basis up to the 18th year after which an elective course of study may be adopted with profit.

4—The certainty of spiritual crisis in the life of the child must be taken into account. The course be arranged to provide for these.

The course of study should provide for pupils in the primary, 5 to 11 years; intermediate, 12 to 18 years; and adult grades.

A general plan of study suited to each period in child life was outlined. The lecture on Wednesday evening next will be on the preparation of the lesson by the teacher.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered minerals in place, may locate a claim 1,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office. One additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$3.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted of the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres. The patent for a mining location shall provide for the payment of

royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark to excavate leases.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing position. Entry may be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the entry consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, gulch or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$5. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee. Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospectively by the applicant or his agent; is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and at least \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unprospected land for agricultural and building purposes.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery as an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

A FATAL FIRE

REPORTED FROM BRUDERHEIM

Leslie's Store burned, and parts of a body said to have been found.

Bulletin Special.

Fort Saskatchewan, Jan. 27th.—Word was brought here yesterday that Wm. Leslie's store and all the contents at Bruderheim had been burnt to the ground on the night of Jan. 25th. Nothing was saved at all. The first report was that there had been a man burnt to death in the fire as parts of the body could be seen. Later on it was learned that the body was that of Wm. Leslie himself. The Mounted Police and coroner were notified and at once left for the scene of the disaster.

Bachelor Burned to Death.

Bulletin Special.

Winnipeg, Jan. 26.—A bachelor named William Hosick living near the Indian reserve at the rapids on the Redsea near Dominion City, was burned to death by the burning of his shanty during the storm of last night. The cause of the fire is unknown. The body was burned beyond recognition.

Greenway May be Appointed.

Bulletin Special.

Ottawa, Jan. 26.—It is understood Premier Greenway of Manitoba will be appointed Chairman of the Agriculture Committee.

Contracts Let for Double Tracks.

Bulletin Special.

Montreal, Jan. 27.—Wm. White of the C. P. R., started for Winnipeg yesterday. Contracts have been awarded for double tracking the line between Winnipeg and Fort William. Four million dollars will be expended on the system between Winnipeg and Montreal, 500 miles of new track being laid and many new stations erected.

Criminal Lunacy in Toronto.

Bulletin Special.

Toronto, Jan. 27.—A lunatic drew a razor and badly cut two attendants in the neck. Two Christian Scientists are responsible for manslaughter for the death of William Goodfellow without medical aid.

Prisoner Recaptured.

Bulletin Special.

Virden, Jan. 27.—Convict McQuillan, who jumped from the C. P. R. train here was captured by Sgt. Fyfe. The prisoner had on neither mitts nor overcoat and only thin boots.

St. Petersburg Quiet.

Bulletin Special.

Leningrad, Jan. 27th.—With troops patrolling the streets of St. Petersburg, Moscow, Leningrad, Odessa, Dnepro, and other industrial centres of Russia there were yesterday no serious collisions with strikers. In Moscow some of the employers are evincing a willingness to make some concessions to workmen but there has been no general agreement on that point. In St. Petersburg, the return of workmen enabled the factories to resume operations and the authorities hope to witness a general resumption on Monday. The Minister of the Interior has promised to consider the case of prohibited writers who were sent to the St. Petersburg and St. Paul fortresses for their activity in the agitation and has given a qualified promise that they shall be released.

Traffic Tied Up.

Bulletin Special.

St. John N. B. Jan. 27th.—Eighteen inches of snow has fallen in this province and no train has left or reached the city today. The car service is blocked eight miles west of the train from Regina with passengers has been stuck since last evening. The cut-off can only be cleared by communication between St. John and the suburbs is carried on by men on snowshoes.

THIRD CUP GAME

WON BY STRATHCONA TEAM

The Visitors Capture the Third Game in the Pederson Cup Series and win The Trophy.

Strathcona won the third game of the Pederson Cup series at the Thistle rink last evening.

The game was hard fought throughout and although when time was called Strathcona had six goals against Edmonton's three, it in no wise shows the comparative playing of the two teams.

The game started sharply at 8.30 with the following players arrayed against each other:—

EDMONTON	STRATHCONA.
Goodridge	Goal Humestone
Banford	Point Elliott
Elliott	Cover McRae
Sherman	Rover McKernan
Deeton	R. Wing Kent
Johnston	Center Richie
Wright	L. Wing Dobson

From the first clash of sticks the tactics of the two teams became evident, Edmonton relying upon their fast passes and shooting, while Strathcona's constant aim seemed to be in securing a right of way for the puck to Edmonton's goal by the weight of her men and in this they were amazingly successful as the score indicates.

Some considerable fault was found with Mr. Hays of Strathcona who refereed the game. Otherwise it was a splendid contest throughout, showing in what direction the strength of the two teams lie.

By a brilliant rush of the Strathcona forwards Kent was enabled to make a goal in 45 seconds from the beginning of play.

Deeton then retaliated in eight minutes more.

Both teams now settled down to hard work, neither side being able to locate the goals for 20 minutes more, when McRae started the Strathcona contingent shrieking by making the score 2 to 1 in favor of Strathcona.

Four minutes later Dobson repeated and so the half ended, Strathcona jubilant, score 3 to 1.

Six minutes after the second half began Deeton raised the spirits of the Edmonton contingent by a beautiful long distance shot making the second goal for Edmonton. Two minutes later Johnston by another long distance shot tied the Score, 3 to 3.

Then in swift succession followed a goal in 15 seconds of play, another by McQuerman in 4 minutes more and just as McRae made the sixth score the referee's bell announced the game finished.

THE EDMONTON PUBLIC HOSPITAL

Annual Meeting being Held this Afternoon—Directors' Report for the Past Year—Balance Sheet and Statement of Assets and Liabilities.

The annual meeting of the Edmonton Public Hospital is being held in the council chamber this afternoon.

DIRECTORS' REPORT.

Following is the report of the Directors for the year ending Dec. 31st, 1904:

The past year has been in many respects one of the most successful in the history of the hospital. Notwithstanding the very considerable outlay of \$1,075.00 in the improvement of the buildings and furnishings, including the installation of the city water system; repairs to the plumbing whereby the sanitary condition of the building has been much improved; and extensive repairs to the laundry; also the payment of nearly \$500 in interest on loans, the liabilities at the end of the year were \$2270.00 less than they were at the close of 1903. The Government grants earned, and unpaid at the end of the year, would pay all outstanding accounts and leave a balance of \$425.00 to be applied in reducing the debt.

During the year two hundred and seventy four (274) patients received treatment. Though this number is smaller than that of 1903 yet there is little difference in the number of hospital days. The particulars of patients are as follows:—Males 175; females 99; total 274. No. of hospital days 4,732; No. of births 14; No. of deaths 19.

NATIONALITY OF PATIENTS

Quaker.....	1
Unitarian.....	1
Salvation Army.....	1

Total 274

The sincere thanks of the Board as well as of the general public are due to the ladies of the Woman's Hospital Aid Society for their splendid work during the year, their contributions amounting to the handsome sum of \$1,980.00. We are assured that the ladies having done so well during 1904 will not slacken their efforts but that even greater things may be looked for in the future.

Several changes have been made in the staff during the year, the present staff being composed of the Superintendent, Miss Cowhill, and three nurses: Misses McKnight, Andrews and Robb. The Board appreciates very highly the excellent services rendered by the staff, especially by the Superintendent who has shown her efficiency both as a manager and a nurse.

The Board regrets that they have not received the benefit of the advice of the Medical Board of the hospital in regard to improvements and for which a plan would make the hospital as efficient as possible. They are of the opinion that were the said Medical Board, as a body, to cooperate with this Board, their greater knowledge of what is necessary in many

lines would very materially assist the Directors in making improvements.

In conclusion the Board desire to thank all those who have rendered aid to the hospital either with money or other donations.

Used in H.B.K. Mitts, Gloves and Moccasins—tough as whalebone, flexible, soft, pliable, scorch-proof, wind-proof, boil-proof, crack-proof, tear proof, rip-proof, cold-proof, almost wear-proof—certainly the greatest leather ever used in mitts and gloves.

Like buckskin it is tanned without oil, unlike buckskin it is not porous, it is wind-proof—will outwear three buckskins.

"Pinto" Mitts and Gloves never crack or harden, never get sodden, are always warm, pliable, soft and comfortable.

Sold at all dealers but never without this brand.

HUDSON BAY KNITTING CO.
Montreal Winnipeg Denver

BECAUSE PROPERLY CURED

Y Paraphs have been called a "Hush" cigar and this is why. Every leaf of tobacco I work into Paraph is absolutely free of "gum."

You must know that a "gummy" tobacco will make a poor smoke and act injuriously on the throat and stomach. The gum, dissolved by the heat of combustion, is drawn into the mouth—becomes mixed with the saliva and finally reaches the stomach.

The membrane that lines your throat and stomach is pretty tough—but it won't stand the harsh, irritating action of this dissolved gum.

You'll have sore throat if you smoke the "gum" cigar—you'll have heartburn, indigestion, and a disagreeable taste in your mouth from an injured stomach.

With every particle of gum properly "sweated," cured and aged out of the leaf I use as filler for my Paraph, I can guarantee you a pure, cool, sweet, fragrant smoke—free from disagreeable tastes and injurious actions on the inner man.

THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy so far as education and enlightenment goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, highways, docks, ships and vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skilful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point; the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this angle, the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "since iron is practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to our iron countries and sections of countries.

Speaking of our own country, this vast Canada—with its limitless resources in the form of minerals, timber, etc.—how we have a young country, a growing country, full of great prospects and with a vast future. Unknown by the past and mist of uncertainty or inconsequence she looms up before us in all her might. With our stretched arms she invites us to share her gifts and her future. Her dowry is an ample one, nor does she withhold it from those who have the wisdom to know her charms. Her gifts are many and precious. Her will is strong and as surely her will can be done as surely her will can be done. In fact, she will build her railways, the Great Trunk and the Canadian Northern, erect in themselves a vast underpinning, being but an earnest of future and of still greater enterprises. She must have also bridges, ships, machinery and the thousand and one other necessities which go to build up a large nation which she will surely one day become. Think of this, to build up a nation! Great the stupendous meaning which this implies and ask yourself the question "how are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our garden, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we have ready to our hand. In other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them, let us indiscriminately throw away money in with careless recklessness and with due regard to economy and the foreable measure of success which such location promises.

There are those who would say that the average percent of iron mines will have a pay of small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the

number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, decry any form of mining which in short impedes the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in building up his country by studying its natural resources and assisting to develop them?

It almost devolves upon us as a duty, which we owe to our children and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testimonials exacted from us by nature before she will yield up her stores in trust for future generations. Taking the iron belts on this continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our arm pit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in medical parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch out a geographical chart of all the iron districts and leads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations where carried out on the basis above illustrated. We refer to the world famed iron mines of the Mesabi range in Minnesota, U. S. A., throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular claim is that of a gentleman who rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$30,000. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxides exposed on his land were valuable, and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$8,000,000.00. His income from this source alone is \$750,000 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta and far from the Canadian Northern Railroad and close to the route of the Great Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blackmore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposit that the springs come from a stratified ore body below which could be followed by workings."

Alluding to a proposed expenditure of \$10,000,000 he adds: "Having had thirty years experience in locating and working various iron deposits, I have no hesitation in saying that this is a valuable property and one which will justify its expenditure recommended."

The mineral deposits he finds by analysis consists of 42 per cent. of metallic iron from which one and one-half per cent. of iron could be used to produce an excellent material for which a market could be found, but it could also be used in combination with other ores or smelted and iron and steel manufactured, similar to that so successfully carried at the Mesabi range, Quebec province for many years.

Small wonder then that it is a valuable and immense property, has created such a stir among mining circles in various parts, not only of this country but elsewhere.

LOCAL

—Train on time.

—The regular monthly examinations are being held at Alberta College to day and Monday.

—Battleford Herald:—Lt. Col. McDonnell of the R.N.W.M.P., arrived on Friday last to take over the command of this post.

The first load of fish from Lesser Slave Lake arrived in the city yesterday. About forty loads more will be here in a few days.

The Maccabees gave a dance in Sandi on Hall last evening, about forty couples being present. Music was provided by Clara's orchestra, and a very enjoyable evening was spent.

—Free Press:—Dr. R. M. Riddell, one of the best known of Winnipeg's young physicians, died yesterday morning after a very brief illness, being a victim of typhoid fever. He was taken ill about two weeks ago, but the fever spread to his lungs, and last Friday his life was despaired of. His brothers were sent for and received his final messages. The doctor was a Manitoba boy by birth and education, having been born in the southern part of the province and received his degree from the Manitoba Medical College. He had a large circle of friends in the city, being a member of several fraternal organizations. A man of peculiar and strong personality he was greatly respected by all who knew him. From his earliest youth he possessed one great attribute which was evidenced in his medical practice, and that was the deep sympathy with all forms of suffering. Any tale of hardship or scene of suffering affected him deeply and won his immediate help.

—Medicine Hat Times:—In conversation with the Times recently, Councillor Drinnan mentioned that the Council had approached the local architects as to the probable cost of a municipal building, and the figures, roughly given, have rather startled the Councillors. As much as 25,000 has been mentioned as the probable cost of a building having a basement and two floors. The Council propose to put up a building 50 ft. by 100 ft. In the basement they propose to have police cells, an office for the chief, workroom for gas manager, recreation room for fire brigade, and a room in which to hold police courts. On the ground floor they propose entrance hall, council chamber, Mayor's parlor and offices of the town clerk and three other officials. On the same floor would be a fire hall with quarters for the men and horses and area for horse reels, chemical wagon, etc. The upper floor is to be a public hall.

Battleford Herald:—The Railway Committee have arranged to have Mr. Prince, M.L.A., proceed to Ottawa at once to look after all matters in which Battleford is interested. Amongst these is the bridge across the Saskatchewan at this point, the spur line and the numerous railway charters which have been applied for and which have Battleford as one of their objective points. In the latter case it is very important to see that the roads are bound to come to Battleford, not to a point "at or near." The town council have endorsed the action of Mr. Prince and have made a grant to the railway committee towards the expenses of the trip. They have asked Mr. Prince to look after the application of the council for the unceded town lots and the repairing of the Battle River bridge. We understand the Board of Trade are considering the matter of the in ressing stream of emigration that is coming this way and may ask the Government to provide some accommodation for the emigrants. As it is likely that this will be the end of track for the greater part of this year we should endeavor to have some kind of an emigration building erected.

The Canadian Northwest Homestead Regulations

Any even numbered section of Dominion Lands in Manitoba or the Northwest Territories, excepting 8 and 26, which has not been homesteaded, or reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age to the extent of one quarter section, of 160 acres, more or less.

ENTRY.—Entry may be made in the district in which the land to be taken is situated, or, if the homesteader desires, he may, on applica-

Notice

At a meeting of the Directors of

The Whitelaw Co. Limited,

Held 5th January 1905, it was unanimously decided that on and after the First day of February, 1905, a strictly

CASH BUSINESS

would be done.

We take this opportunity of thanking the Public heartily for their past patronage, and trust that, even under the new conditions, they will continue to favor us with a fair share of their custom.

We anticipate that being on a Cash Basis we shall be enabled to supply FIRST-CLASS GOODS at the lowest possible prices consistent with business methods.

THE WHITELOW CO., Ltd.

Fraser Block.

Phone 31

tion to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him. A fee of \$10.00 is charged for a homestead entry.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required by the provisions of the Dominion Lands Act and the amendments thereto, to perform the conditions connected therewith, under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of this Act, reside upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent, may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his homestead, or a certificate for the issue of such patent, countersigned in the manner prescribed by this Act, and has obtained entry for a second homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by residence upon the first homestead. If the second homestead is in the vicinity of the first homestead.

(4) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon said land.

The term "vicinity" used above is meant to indicate the same township or an adjoining or cornering township.

A settler who avails himself of the provisions of Clauses 2, 3, or 4, must or substitute 20 head of stock, with buildings for their accommodation, cultivate 30 acres of his homestead, and have besides 80 acres sub-tenanted.

The privilege of a second entry is restricted by law to those settlers only who completed the duties upon their first homesteads to entitle them to patent on or before the 2nd June, 1899.

Every homesteader who fails to comply with the requirements of the homestead law is liable to have his entry cancelled, and the land may be again thrown open for entry.

Application for patent should be made at the end of three years, before the local agent, sub-agent, or Homestead Inspector. Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands, at Ottawa, of his intention to do so.

Information.—Newly freed immigrants will receive at the Immigration Office, in Winnipeg, or at any Dominion Lands Office, in Manitoba or the Northwest Territories, information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing land to suit them.

Full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

W. W. CORY.

Deputy Minister of the Interior. N.B.—In addition to Free Grant Lands to which the regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from private land owners or corporations and railroad firms in Western Canada.
